Increasing access to pharmacist services makes a difference

Healthier communities, healthier individuals

APhA Foundation provides the evidence to support pharmacists’ expanding roles and achieving provider status

5,200 patients cared for across all projects

93.6% became healthier through our work

78% included in research outcomes

69% met treatment goals

Pharmacists can improve patient’s overall health

**Project ImPACT: Immunizations:** 41.4% increase in the number of vaccines administered when pharmacists have access to a patient’s vaccine history and can identify unmet vaccination needs.¹

**Project ImPACT: Depression:** 80% of patients exhibited a decrease in severity of depression after pharmacist-provided intervention.²

**Project ImPACT: Hyperlipidemia:** 90.1% rate of medication compliance when pharmacists have immediate access to patient data.³

**Diabetes Ten City Challenge:** Employers saved $1,079 on average per patient by investing in pharmacist as part of health care team.⁴

Patient Self-Management Program for Diabetes: Initiating a multistate community pharmacy services program for patients with diabetes resulted in a 10.8% decrease in total mean health care costs per patient per year.⁵
